PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience in back-end engineering (Node.js/NestJS) and system architecture, transitioning into **Offensive Security / Penetration Testing**. Strong foundation in secure API development, OWASP practices, JWT/OAuth2 authentication, and Docker containerization — skills directly transferable to vulnerability identification and exploitation. Currently completing specialized training in Bug Bounty and Pentesting (Solyd One), with an active account on **HackerOne** and hands-on offensive security projects.

PROFESSIONAL EXPERIENCE

Simplifit Academias — Sep. 2025 - Feb. 2026

Full-Stack / Mobile Developer — *Teresina, PI — On-site*

- Architected and developed RESTful APIs with **NestJS + Prisma** and PostgreSQL, applying **JWT authentication**, rate limiting, and input validation to mitigate OWASP Top 10 vulnerabilities.
- Led mobile application development (**React Native**) for member management, implementing secure authentication flows and encryption of sensitive data in transit.
- Integrated OpenAI services with granular access control and credential protection via environment variables and secret management.
- Used **Docker** for environment standardization and service isolation, reducing the attack surface in production.

Stack: Node.js · NestJS · Prisma · PostgreSQL · React Native · Next.js · Docker · OpenAI · Git

Developer Community — Nov. 2024 - Present

Junior Full-Stack Developer — *Remote*

- Built the back-end of **ConstructEasy** — a SaaS platform for construction management — with a focus on endpoint security, role-based access control (RBAC), and input sanitization.
- Configured development environments using **Docker + Nginx** as reverse proxy, applying hardening best practices and minimal service exposure.
- Managed **Supabase** authentication and Row Level Security (RLS) policies for fine-grained data access control.

Stack: Node.js · NestJS · Express · Prisma · PostgreSQL · Supabase · React · Next.js · Nginx · Docker · Linux · Git

Timon City Hall — Technology & Information Agency (ATI) — Jun. 2025 - Aug. 2025

Software Developer Intern — *Timon, MA — Hybrid*

- Participated in the deployment of the **Electronic Information System (SEI)** for the municipality, mapping process flows and integrating digital services with a focus on authentication and access control.
- Developed government-facing web applications with **Next.js**, applying Content Security Policy (CSP) headers and hardening best practices for public-facing systems.

Stack: WordPress · Next.js · NestJS · Prisma · PostgreSQL · Docker · Linux · Git

FAPEMA — IFMA Research Fellowship — Nov. 2024 - Jul. 2025

Research Fellow — *Timon, MA*

- Developed a real-time air quality monitoring system using **ESP32 + Node.js**, integrating hardware with a back-end API via MQTT — with a focus on **IoT device security** and secure data transmission.
- Built a secure data pipeline for collection, transmission, and visualization of environmental metrics in school environments.

EDUCATION & TRAINING

Federal Institute of Maranhão — IFMA
2023 - 2025

A.S. in Internet Systems — *Timon, MA*

- English Language Teaching Assistant (scholarship), supporting students in grammar, reading, and conversation.
- **3rd place at IFMA Ideathon** — awarded BRL 2,000 for a smart city & sustainable entrepreneurship project.
- Delivered an introductory game development course using GameMaker for external audiences, focused on logic and game design.

Solyd One — Bug Bounty & Penetration Testing
2025 - In Progress

Offensive Security Specialization — *Online*

- Hands-on training in Web Pentesting, reconnaissance, vulnerability exploitation (SQLi, XSS, SSRF, IDOR, RCE), and Bug Bounty methodologies.
- Active account on **HackerOne**, focusing on web application bug bounty programs.

TECHNICAL SKILLS

Offensive Security

OWASP Top 10 | SQL Injection | XSS | SSRF | IDOR | Burp Suite | Web Reconnaissance | Bug Bounty | HackerOne

Back-End & Infrastructure

Node.js | NestJS | Express | AdonisJS | Python | PostgreSQL | Supabase | Prisma | Docker | Nginx | Linux | Git

Front-End & Mobile

React | Next.js | React Native | TypeScript | TailwindCSS

Languages

Portuguese (native) · English (intermediate — advanced technical reading)
