PROFESSIONAL SUMMARY

Backend / Full-Stack Software Engineer and **Application Security (AppSec & Web Pentesting) Researcher** with a degree in Internet Systems from **IFMA**. Proven track record architecting scalable RESTful APIs and production applications using **Node.js, NestJS, TypeScript, Python (FastAPI), and Prisma ORM** backed by **PostgreSQL / MySQL**, modern web/mobile frontends (**Next.js, React Native**), and cloud/containerized infrastructure (**AWS Lambda, SQS, S3, Docker, GitHub Actions CI/CD**). Combines production software engineering with hands-on offensive security (**OWASP Top 10** exploitation & remediation, automated Python exploit PoCs, **JWT/OAuth2/RBAC/RLS** access control, and Bug Bounty research on **HackerOne**).

PROFESSIONAL EXPERIENCE

Simplifit Academias

Sep. 2025 - Feb. 2026

Full-Stack / Mobile Developer & Backend Architect — *Teresina, PI — Brazil*

- Architected and delivered modular **RESTful APIs** with **Node.js, NestJS, TypeScript, and Prisma ORM** (PostgreSQL/MySQL), implementing **JWT/OAuth2 authentication, CASL RBAC/ABAC authorization**, automated audit logging, rate limiting, and strict DTO validation to prevent **OWASP Top 10** vulnerabilities (BOLA/IDOR, Mass Assignment, SQLi).
- Led the development of the cross-platform mobile app (**React Native / Expo**) and web dashboards (**Next.js**) serving 8,000+ monthly active users across 12 gym locations with real-time **Socket.IO** messaging.
- Integrated **OpenAI LLM** workflows on **AWS Serverless (Lambda, SQS, S3)** and standardized deployments via **Docker and GitHub Actions CI/CD**.

Stack: Node.js · NestJS · TypeScript · Prisma · PostgreSQL · MySQL · React Native · Next.js · AWS (Lambda, SQS, S3) · Docker · CI/CD

Developer Community

Nov. 2024 - Sep. 2025

Full-Stack Developer — *Remote*

- Built backend services for the **ConstructEasy** SaaS platform using **Node.js, NestJS, Express, and TypeScript**, applying Clean Architecture and Repository patterns for secure REST endpoints.
- Designed **PostgreSQL** database schemas and migrations with Prisma ORM and managed **Supabase** authentication with fine-grained **Row Level Security (RLS)** and RBAC policies.
- Configured containerized environments with **Docker + Nginx** reverse proxy, applying Linux server hardening and minimal attack surface exposure.

Stack: Node.js · NestJS · TypeScript · PostgreSQL · Prisma · Supabase (RLS) · Next.js · Docker · Nginx · Linux · GitHub Actions

Timon Municipal Government — Technology & Information Agency (ATI)

Jun. 2025 - Aug. 2025

Software Developer Intern — *Timon, MA — Brazil*

- Contributed to the technical deployment and **REST API** integration of the municipal **Electronic Information System (SEI)**, streamlining public administration workflows.
- Developed and maintained institutional web portals using **Next.js, React, Node.js (NestJS + Prisma), PostgreSQL, and Docker** on Linux, enforcing Content Security Policy (**CSP**) headers, HTTPS, and access controls.

FAPEMA / IFMA & Independent Offensive Security Research

Nov. 2024 - Present

Research Fellow (IoT/Backend) & Offensive Security Researcher (HackerOne) — *Timon, MA / Remote*

- Engineered a FAPEMA-funded real-time environmental monitoring system integrating **ESP32 microcontrollers (C++ / ENS160 sensor)** with a **NestJS + Prisma + PostgreSQL** backend (including automated PDF report generation) and a **Next.js** dashboard.
- Conducts continuous Web Penetration Testing and Bug Bounty research (**HackerOne, PortSwigger Web Security Academy, TryHackMe**), developing automated **Python** exploit scripts for Business Logic Flaws, CSRF token extraction, SQLi, XSS, SSRF, and IDOR/BOLA.

EDUCATION & SPECIALIZED SECURITY TRAINING

Federal Institute of Maranhão — IFMA

2023 - Graduated Nov. 2025

B.Tech / Associate Degree in Internet Systems (Sistemas para Internet) — *Timon, MA — Brazil*

- **3rd Place at IFMA Ideathon:** Awarded for a Smart City technology solution. Former English Teaching Assistant (scholarship) and Extension Instructor in Programming Logic.
- **Offensive Security Training (Solyd One):** Completed the *"Do Bug ao Bounty"* (Web Pentesting & Bug Bounty) program and **actively preparing for the SYCP (Solyd Certified Pentester) certification**.

TECHNICAL SKILLS

Backend Engineering, APIs & Databases

`Node.js` `NestJS` `TypeScript` `Python (FastAPI)` `Prisma ORM` `PostgreSQL` `MySQL` `Supabase (RLS)` `REST APIs & WebSockets` `Redis`

Application Security (AppSec) & Offensive Security

`OWASP Top 10` `Web Pentesting (SQLi, XSS, IDOR/BOLA, SSRF, CSRF)` `Business Logic Flaws` `JWT / OAuth2 / RBAC / CASL` `Burp Suite` `Nmap · FFUF · Nuclei · SQLMap` `Python Exploit Automation`

Frontend, Mobile, Cloud & DevOps

`Next.js` `React.js` `React Native (Expo)` `Tailwind CSS` `Docker & Nginx` `AWS (Lambda, SQS, S3)` `GitHub Actions (CI/CD)` `Linux Hardening` `OpenAI / LLMs`

Languages

Portuguese (Native) · English (Professional Working Proficiency — Former English Teaching Assistant at IFMA)
